

# THE BATTLE OF NEIGHBOURHOODS

RESTAURANT LLC

# INTRODUCTION

- New York City assessment for Restaurant LLC
- A good location for a Restaurant business
- Business problem
  - Choice of first neighbourhood to establish restaurant business
  - Easy to repeat
  - Low competition
  - High demand
- Success criteria
  - Best neighbourhood which meets above criteria

# NEW YORK CITY FACTS

- Most populous city in the USA
- Multicultural
- Offers business opportunities
- Business friendly environment
- Global hub of business and commerce
- Major centre for key industries such as financial services, fashion, retailing, world trade, tourism, real estate, media, advertising, accountancy, insurance, theatre, arts etc.

# NEW YORK – BUSINESS ENVIRONMENT ANALYSIS

- There are many restaurant businesses in New York thus competition is high
- A developed city which translates into high cost of doing business
- A careful analysis of any business venture in the city is mandatory
- A strategic business includes doing your homework which ensures
  - You reduce business risk (failure)
  - Increase return on investment

# NEW YORK CITY – CUISINE BACKGROUND

- New York is known for its famous cuisine. New York's food culture has been to a large extent influenced by its large immigrant background and communities.
  - Italian immigrants brought Pizza and Italian cuisine
  - Central and Eastern European immigrants especially Jews brought bagels, delicatessens, hot dogs, cheese cake and knishes etc.
  - Irish immigrants brought corned beef
  - Chinese and South East Asian restaurants, trattorias and coffee houses are common in New York
  - Multiple mobile food vendors
  - Middle Eastern foods such as Döner, Falafel and Kebabs are examples of New York street food
  - New York is home to more than 1000 Michelin starred restaurants
  - With all this competition, it is essential to carefully plan an entry strategy for a new restaurant business in New York City

# FACTORS TO CONSIDER WHEN LOCATING A RESTAURANT

- Menus of competitor restaurants
- Borough constituents
- Population of New York City
- Competitors in a particular location
- Untapped markets
- Location of high traffic facilities that attract high populations e.g. gyms, shopping malls, parks etc.
- Location of Farmers' market where ingredients can be obtained fresh and cheap to maintain quality
- New York city demographics

# DATA DESCRIPTION - I

- Data I: neighbourhood has a total of 306 neighbourhoods and 5 boroughs. In order to segment the neighbourhoods and explore them, we will need a dataset that contains the 5 boroughs and neighbourhoods that exist in each borough. We will also need the latitude and longitude coordinates of each neighbourhood.
- The dataset exists for free on the web
  - [https://geo.nyu.edu/catalog/nyu\\_2451\\_34572](https://geo.nyu.edu/catalog/nyu_2451_34572)

	Borough	Neighborhood	Latitude	Longitude
0	Bronx	Wakefield	40.894705	-73.847201
1	Bronx	Co-op City	40.874294	-73.829939
2	Bronx	Eastchester	40.887556	-73.827806
3	Bronx	Fieldston	40.895437	-73.905643
4	Bronx	Riverdale	40.890834	-73.912585

# DATA DESCRIPTION - II

- Data 2: The Farmers' Markets data
  - <https://data.cityofnewyork.us/dataset/DOHMH-farmers-markets-and-food-boxes/8vwk-6iz2>
- Definition: A farmers' market is defined as a market where local farmers and growers sell their produce directly to the public. Some of the foods found in a farmers' market include dairy products, vegetables, fish, meat, baked foods and processed foods.

## DATA DESCRIPTION - IV

- Foursquare dataset
- New York City geographical coordinates data will be utilized as input for the Foursquare API which will be used to provision information of venues for each neighbourhood. We will utilize the Foursquare API to explore neighbourhoods in New York City. See below an image of the Foursquare API data.

	Neighborhood	NeighborhoodLatitude	NeighborhoodLongitude	Venue	VenueLatitude	VenueLongitude	VenueCategory
0	Marble Hill	40.876551	-73.91066	Arturo's	40.874412	-73.910271	Pizza Place
1	Marble Hill	40.876551	-73.91066	Bikram Yoga	40.876844	-73.906204	Yoga Studio
2	Marble Hill	40.876551	-73.91066	Tibbett Diner	40.880404	-73.908937	Diner
3	Marble Hill	40.876551	-73.91066	Sam's Pizza	40.879435	-73.905859	Pizza Place
4	Marble Hill	40.876551	-73.91066	Loeser's Delicatessen	40.879242	-73.905471	Sandwich Place

# ANALYTICAL APPROACH

- New York City has a total of 5 boroughs and 306 neighbourhoods
- Part 1- Clustering of Manhattan and Brooklyn
- Part 2 – Clustering of Bronx, Staten Island and Queens
- We will only filter restaurant data from Foursquare.com venues data for our project

# EXPLORATORY ANALYSIS – METHODOLOGY I

- Data I: New York Geographical coordinates data
  - Load the data and explore data – newyork\_data.json
  - Transform the data of nested Python dictionaries into Pandas dataframes
  - Dataframe contains the geographical coordinates of New York city neighbourhoods
  - Data will be used to obtain venues data from Foursquare
  - Geopy and Folium libraries will be used to create a map of New York City with neighbourhoods superimposed on top

## EXPLORATORY ANALYSIS – METHODOLOGY - II

- Data 2 – DOHMH Farmers Markets and Food Boxes datasets
- We will be using the dataset of Farmers Markets
- There are in total 144 Farmers Markets in New York City
- Brooklyn (50) has the highest number of markets followed by Manhattan(48), Bronx (24), Queens (18) and Staten Island (4)

# EXPLORATORY ANALYSIS - METHODOLOGY - II

- Farmers Market Visualization – New York City

Map of Farmers Markets

## EXPLORATORY ANALYSIS – METHODOLOGY 3

- Data 3: In order to analyze the New York City population, cuisine and demographics, we scrapped the data from Wikipedia given in the references section
- We used BeautifulSoup Python library
- Definition: BeautifulSoup is a Python package for parsing HTML and XML documents with malformed markup
  - It creates a parse tree for parsed pages that can be used to extract data from HTML and is useful for scraping

# EXPLORATORY ANALYSIS – METHODOLOGY – III (NEW YORK CITY DEMOGRAPHICS)

- New York is the most populous city in the United States of America. It has a record high 8622698 residents as of the US census of 2010.
- The racial composition is shown on the table below. This explains the reason why New York City has restaurants serving cuisines from Africa, Middle East, Japan, India etc. This presents an opportunity for a restaurant business in New York.

Racial composition		2010	1990	1970	1940
0	White	44.0%	52.3%	76.6%	93.6%
1	—Non-Hispanic	33.3%	43.2%	62.9%	92.0%
2	Black or African American	25.5%	28.7%	21.1%	6.1%
3	Hispanic or Latino (of any race)	28.6%	24.4%	16.2%	1.6%
4	Asian	12.7%	7.0%	1.2%	–

# EXPLORATORY ANALYSIS – METHODOLOGY III (CUISINE OF NEW YORK CITY)

- Data taken from Wikipedia ([https://www.wikipedia.org/wiki/Cuisine\\_of\\_New\\_York\\_City](https://www.wikipedia.org/wiki/Cuisine_of_New_York_City)) has been used to create wordclouds.
- Brooklyn cuisine: most preferred cuisine in Brooklyn is Mexican, Puerto Rican and Italian
- Manhattan cuisine: most preferred cuisine in Manhattan is American, Italian, Indian and Puerto Rican

# EXPLORATORY ANALYSIS – METHODOLOGY III (CUISINE OF NEW YORK CITY)

- Queens cuisine: most preferred cuisine in Queens is Mexican, Irish, Indian and Pakistani
- The Bronx cuisine: most preferred cuisine in the Bronx is Italian, Albanian, Puerto Rican and Dominican

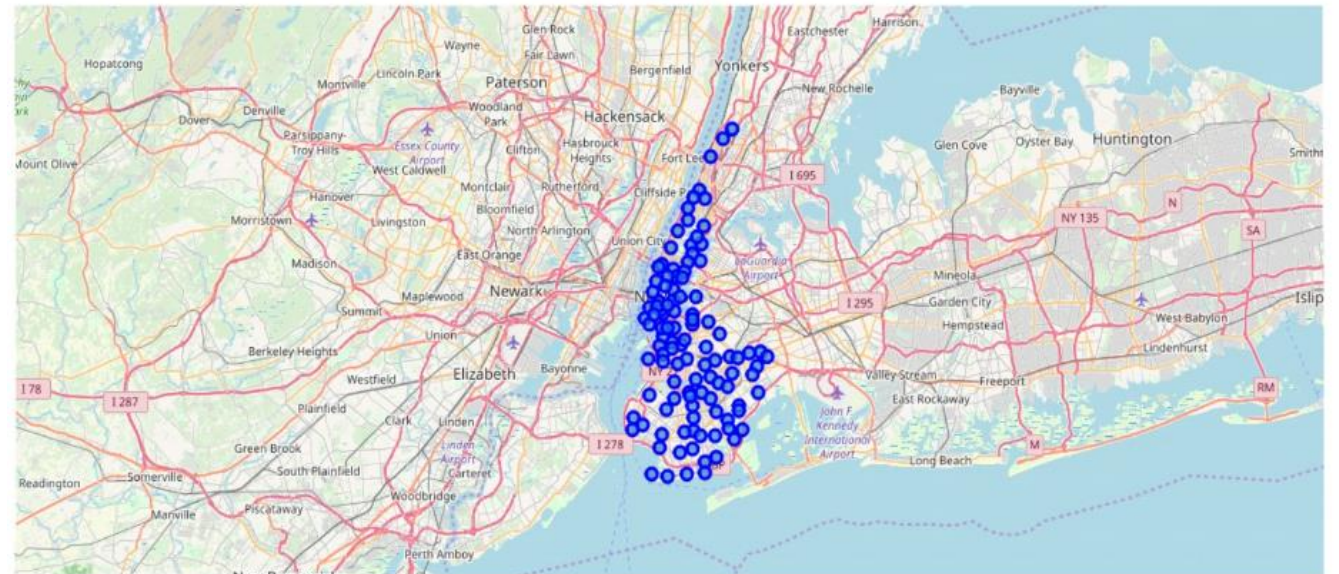

# EXPLORATORY ANALYSIS – METHODOLOGY IV (FOURSQUARE.COM)

- New York city geographical coordinates data has been utilized as input for the Foursquare.com API which provides venues for each neighbourhood.
- Using the geographical coordinates of each neighbourhood Foursquare API calls are made to get top 200 venues in a radius of 1km.

# EXPLORATORY ANALYSIS – METHODOLOGY IV (BROOKLYN AND MANHATTAN)

- Brooklyn and Manhattan visualization

# BROOKLYN AND MANHATTAN

- Brooklyn and Manhattan venues visualization. The „Brooklyn\_Manhattan\_venues“ dataframe has 9708 venues and 397 unique venue types

	Neighborhood	NeighborhoodLatitude	NeighborhoodLongitude	Venue	VenueLatitude	VenueLongitude	VenueCategory
0	Marble Hill	40.876551	-73.91066	Arturo's	40.874412	-73.910271	Pizza Place
1	Marble Hill	40.876551	-73.91066	Bikram Yoga	40.876844	-73.906204	Yoga Studio
2	Marble Hill	40.876551	-73.91066	Tibbett Diner	40.880404	-73.908937	Diner
3	Marble Hill	40.876551	-73.91066	Sam's Pizza	40.879435	-73.905859	Pizza Place
4	Marble Hill	40.876551	-73.91066	Loeser's Delicatessen	40.879242	-73.905471	Sandwich Place

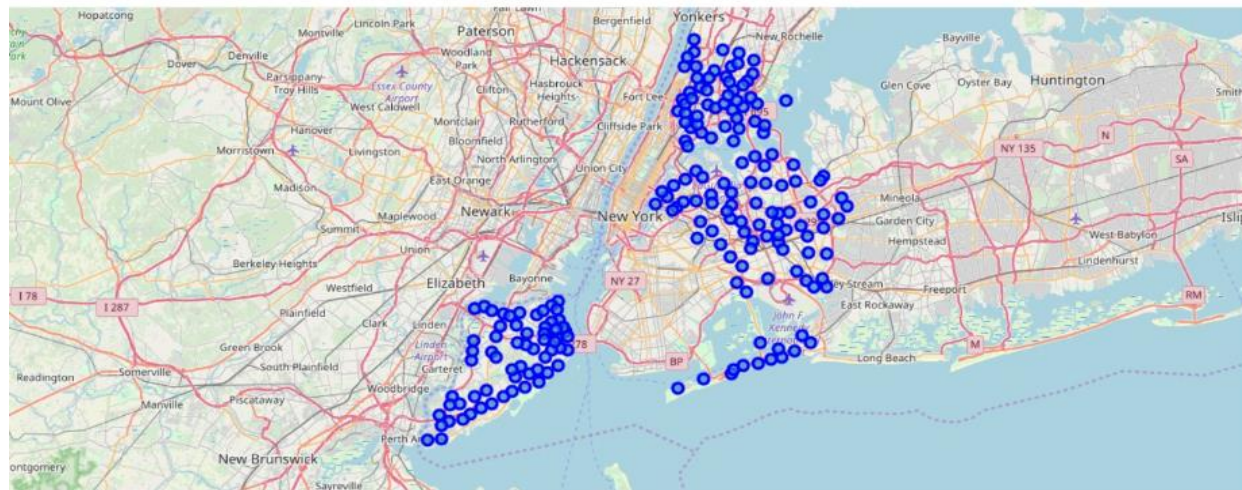

# BRONX, QUEENS AND STATEN ISLAND

- Bronx, Queens and Staten Island venues data

	Neighborhood	NeighborhoodLatitude	NeighborhoodLongitude	Venue	VenueLatitude	VenueLongitude	VenueCategory
0	Wakefield	40.894705	-73.847201	Lollipops Gelato	40.894123	-73.845892	Dessert Shop
1	Wakefield	40.894705	-73.847201	Ripe Kitchen & Bar	40.898152	-73.838875	Caribbean Restaurant
2	Wakefield	40.894705	-73.847201	Jackie's West Indian Bakery	40.889283	-73.843310	Caribbean Restaurant
3	Wakefield	40.894705	-73.847201	Ali's Roti Shop	40.894036	-73.856935	Caribbean Restaurant
4	Wakefield	40.894705	-73.847201	Rite Aid	40.896521	-73.844680	Pharmacy

- Bronx, Queens and Staten Island Visualization

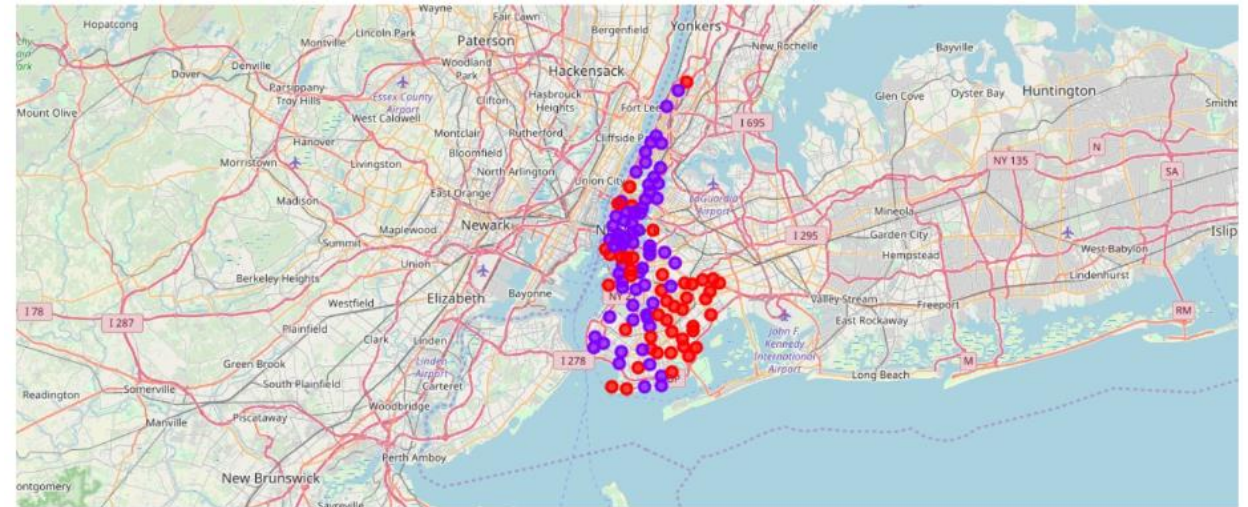

# BRONX, QUEENS AND STATEN ISLAND

- Bronx, Queens and Staten Island visualization: The Bronx\_Queens\_Staten\_Island\_dataframe has 10805 venues and 387 unique venue types

# RESULT –MANHATTAN AND BROOKLYN

- Segmenting and clustering neighbourhoods
- Cluster0: The total and total sum cluster0 has smallest value. It shows that the market is not saturated.
- Cluster I: The total and total sum is very high with a lot of competition and saturated neighbourhoods

# RESULT – BRONX, QUEENS AND STATEN ISLAND

- Segmenting and clustering neighbourhoods
- Cluster0: The total and total sum of cluster0 has smallest value. It shows that the market is not saturated. There is potential for opening a new restaurant business
- Cluster I: The total and total sum is very high with a lot of competition and saturated neighbourhoods

	Borough	Neighborhood	Latitude	Longitude	Total	Cluster_Labels
0	Staten Island	Todt Hill	40.597069	-74.111329	0	0
1	Staten Island	Port Ivory	40.639683	-74.174645	0	0
2	Staten Island	Bloomfield	40.605779	-74.187256	0	0

# DISCUSSION

- In the end we can state emphatically that there is a case for exploring cuisines of various countries in Bronx, Queens and Staten Island
- Manhattan and Brooklyn show openness to cuisines of other countries as part of their menu. If you were to take a risk in Manhattan and Brooklyn then you will need a great menu.
- There is room for increasing the number of Farmers Markets in Bronx, Queens and Staten Island

# CONCLUSION

- This analysis has a limitation of data
- The same program can be rerun using updated data or information
- Brooklyn and Manhattan have very high concentration of restaurant businesses and are competitive
- Bronx, Queens and Staten Island do not have many restaurants so there is scope for new establishments
- There is an opportunity for establishing a Puerto Rican restaurant in the Bronx
